0 BEFORE YOU START

We designed these guidelines to help you take your measurements, so that we can make your bespoke leather suit.

If you have any problems don't worry too much! Our technical staff is at your disposal in order to help you, if you need any support.

If you are in any doubt, please do not hesitate to contact us:

Ph: +39 0444 750 130

WhatsApp: +39 393 939 3655

Mail: customers@vircos.it

Before starting with the measurements please be sure to have with you:

- Measuring tape (a tailor's kind)
- Mobile phone with camera
- A lace

Fitting is crucial for the safety and comfort of your suit and we want to make sure we leaving nothing to chance!

Carefully take pictures of every single measurement you take and send the picture to us; with these pictures we will be able to check immediately and directly how the measurement tape has been used, so it will be just like we were there with you.

In addition we'd like you to send us 3 pictures (in under wear or inner suit) taken from the front, rear and side.

Please do not cut out your head or feet. We will use those picture for a more complete check of your proportions.

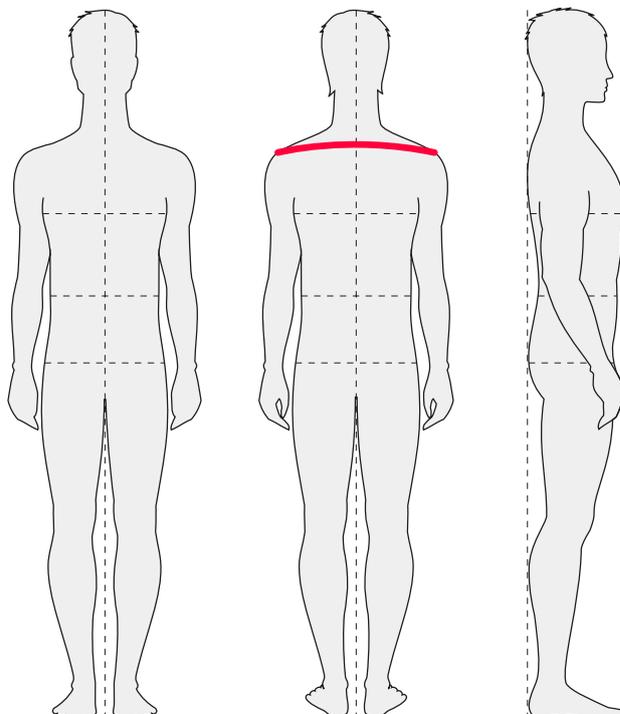

We will never compromise your privacy with us, we keep all your information and pictures archived as directed by the law.

See our privacy policy: <https://vircos.it/en/privacy-policy/>

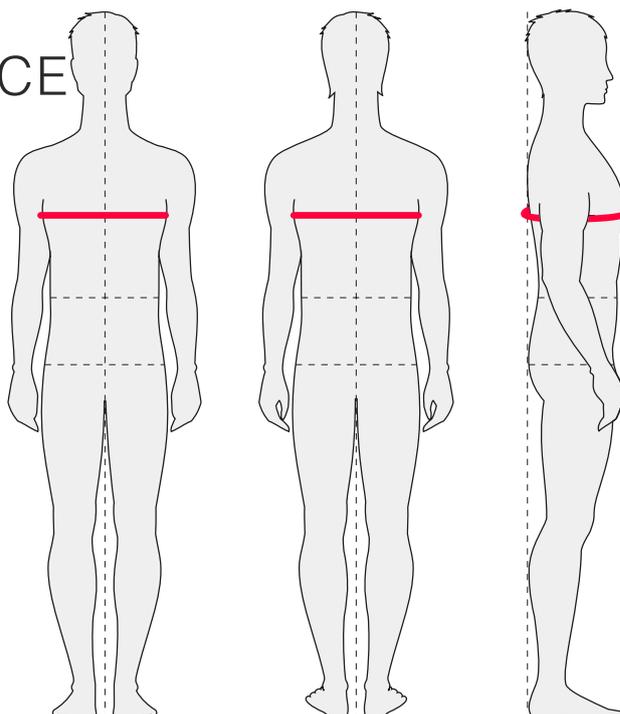

1 SHOULDERS WIDTH

Measure from the shoulder bone straight up to the other shoulder bone (not the shoulder muscle but the bone).

2 CHEST CIRCUMFERENCE

Measure the chest circumference at the widest point. The person should be standing breathing normally and keeping his arms at his sides. Important: do not keep the tape too close to the body or too loose.

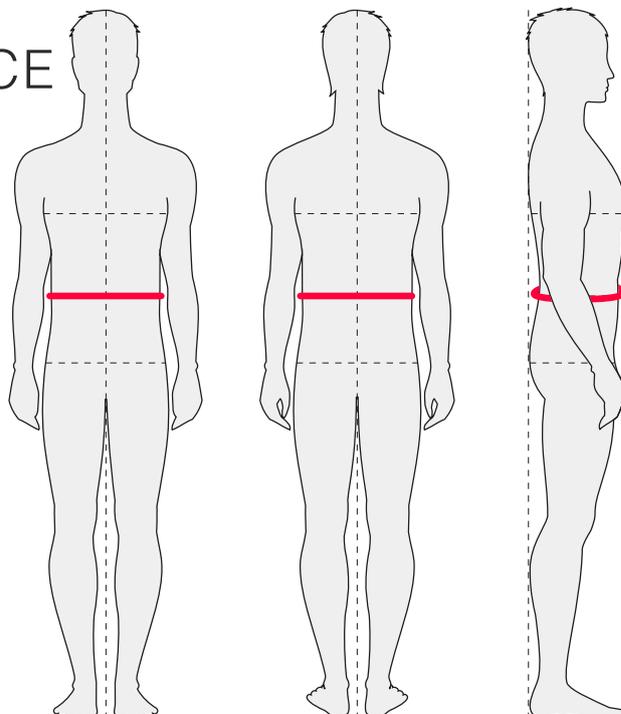

3 WAIST CIRCUMFERENCE

Measure the waist circumference at the navel.

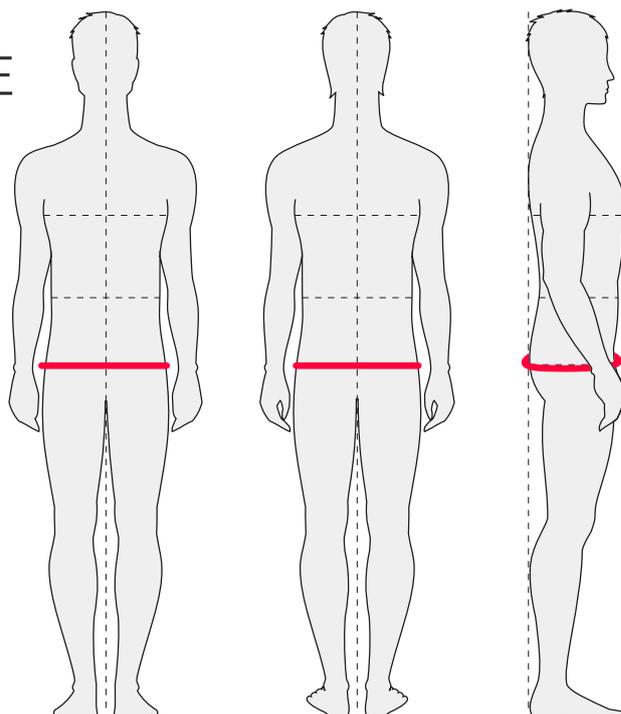

Important: do not keep the tape too close to the body or too loose.

4 HIPS CIRCUMFERENCE

Measure the circumference of the pelvis at the widest point of the pelvis itself or where even the hips and protrude more.

Important: do not keep the tape too close to the body or too loose.

5 LENGTH FROM WAIST TO KNEE

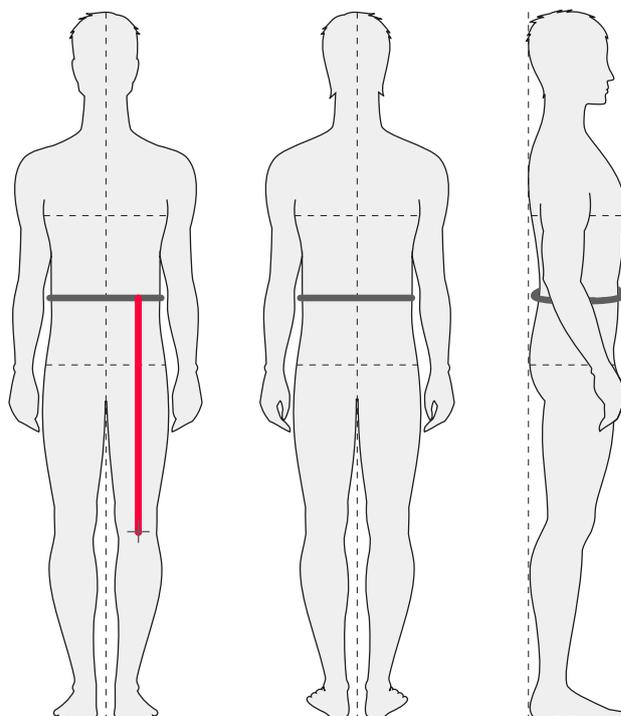

Measure the length from the waist line to the center of the knee.

The person must remain upright during the measurement.

Help to identify the point of waist by tying a lace at the navel.

To find the center of the knee it might

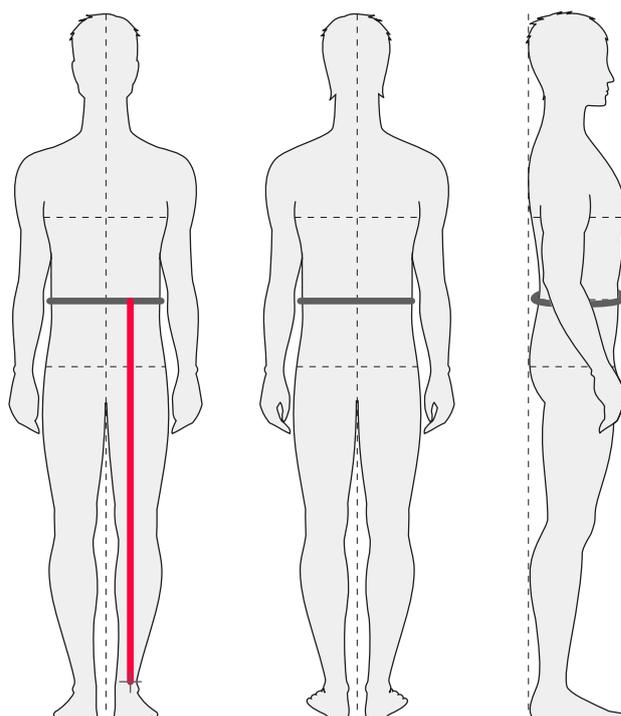

be useful to bend the legs and, with a pen, mark the center of the knee itself.

6 LENGTH FROM WAIST TO ANKLE

As for the previous measure, measure the length from the line of the waist up to the ankle (just above the ankle bone).

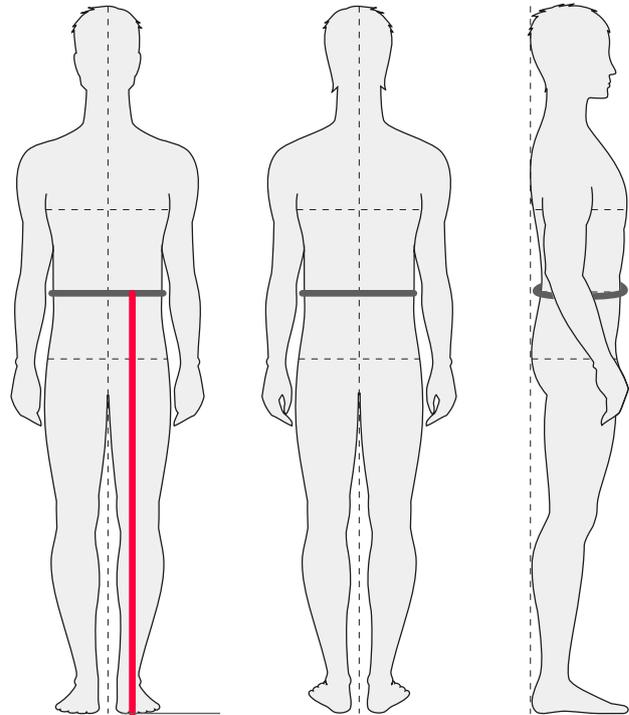

Help to identify the point of waist by tying a lace at the navel.

7 LENGTH FROM WAIST TO GROUND

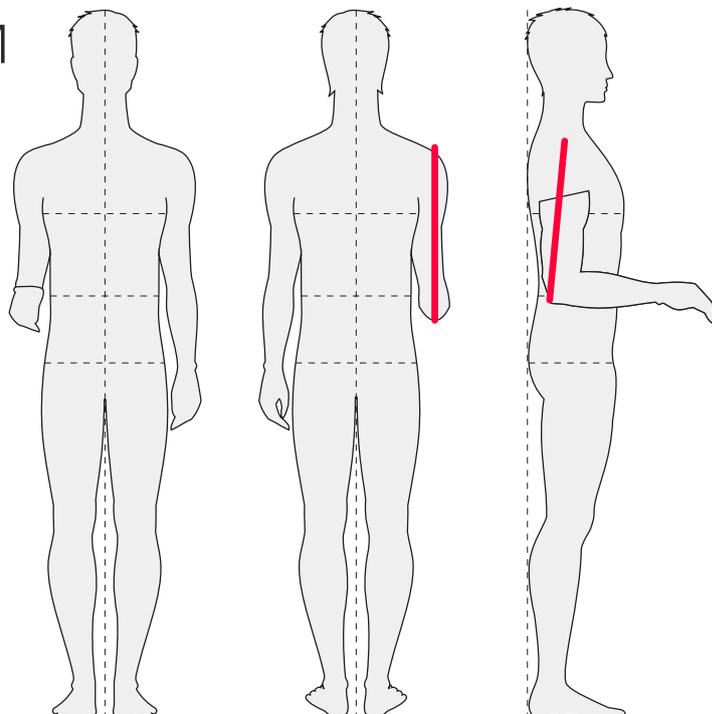

Exactly like the previous measure but coming up to the ground/floor. Help to identify the point of waist by tying a lace at the navel.

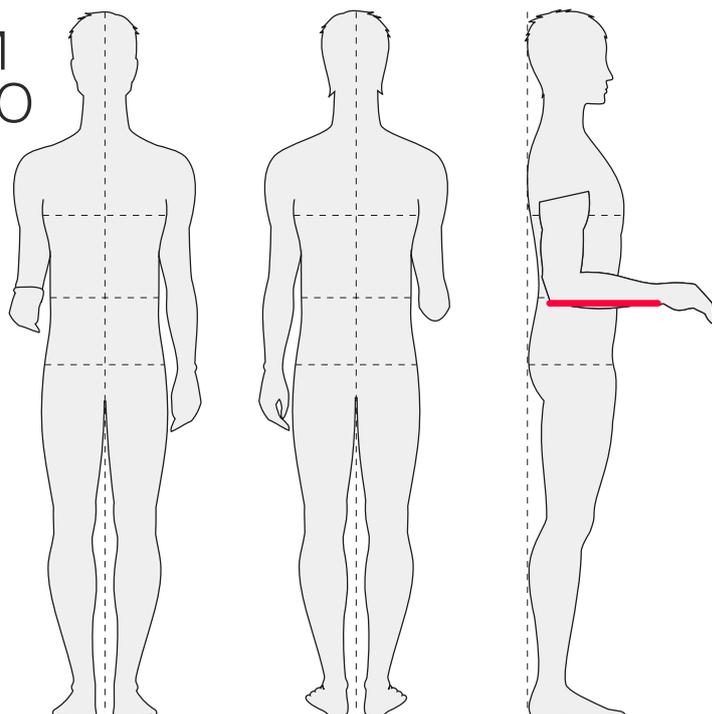

9 SLEEVE LENGTH FROM SHOULDER TO THE ELBOW CENTER

Measure the length of the shoulder bone to the center of the elbow by holding the arm adjacent to the body bent at 90°

10 SLEEVE LENGTH FROM THE ELBOW CENTER TO THE BOTTOM

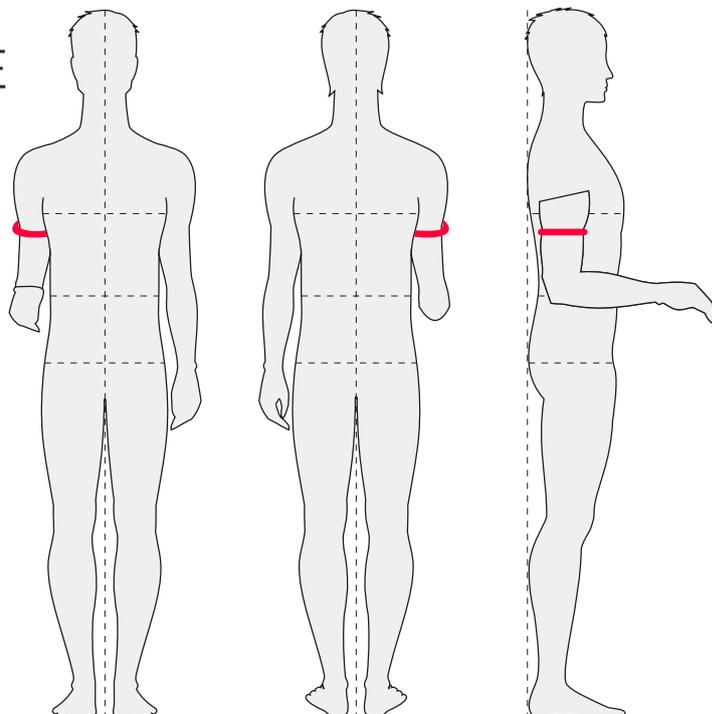

Measure the length from the center of the elbow to the wrist (just before the wrist bone).

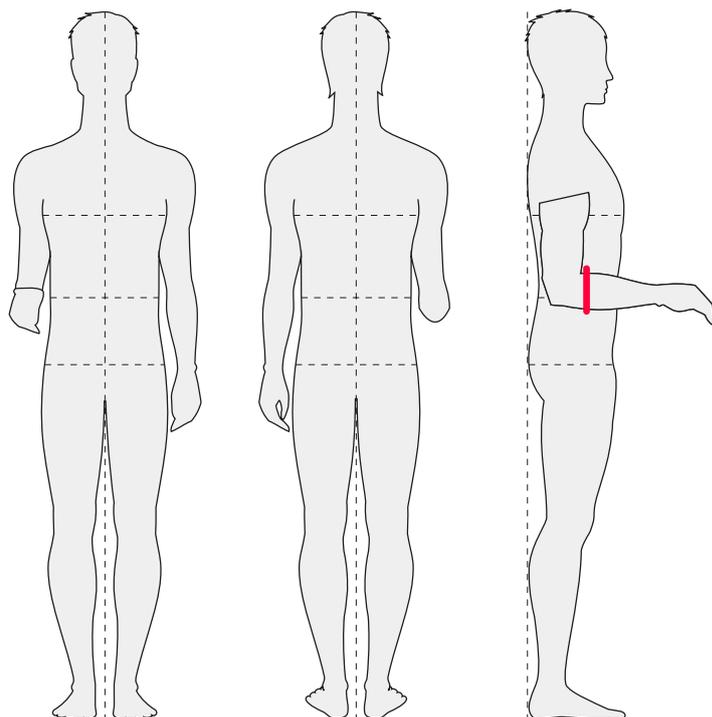

11 ARM CIRCUMFERENCE

Measure the circumference of the biceps while keeping the muscle slightly tensioned.

12 FOREARM CIRCUMFERENCE

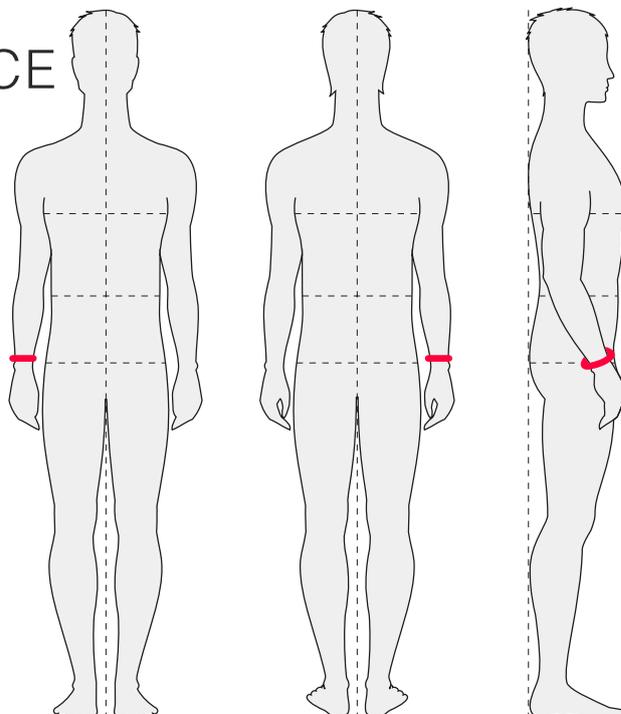

Measure the circumference of the forearm (not too far from the elbow) while keeping the muscle taut.

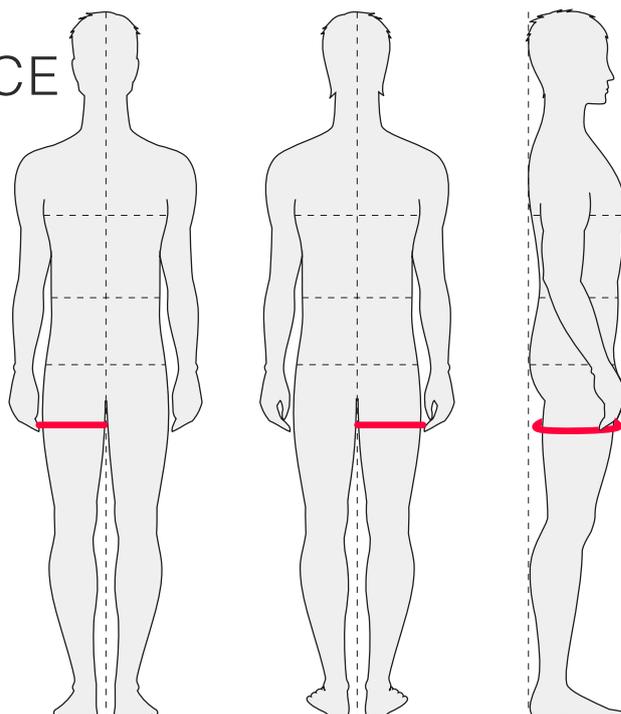

13 WRIST CIRCUMFERENCE

Measure the circumference of the wrist just before the wrist bone.

14 THIGH CIRCUMFERENCE

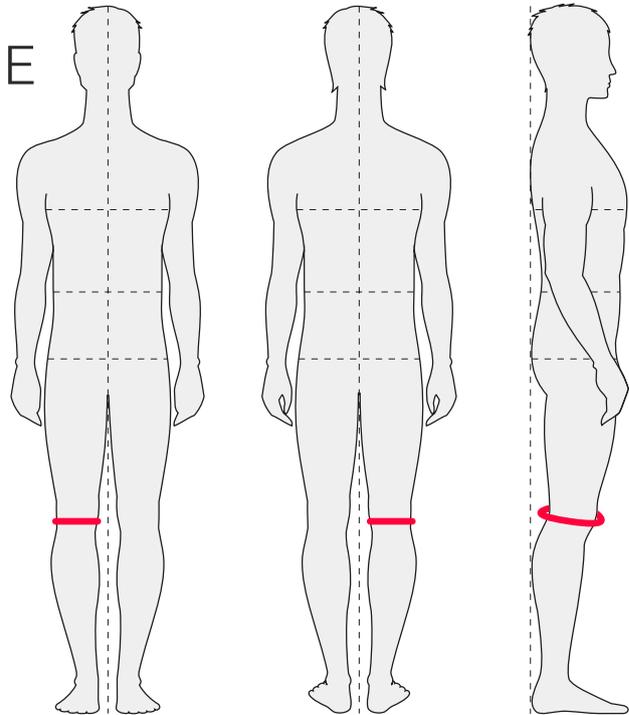

Measure the circumference of the thigh at the widest point.

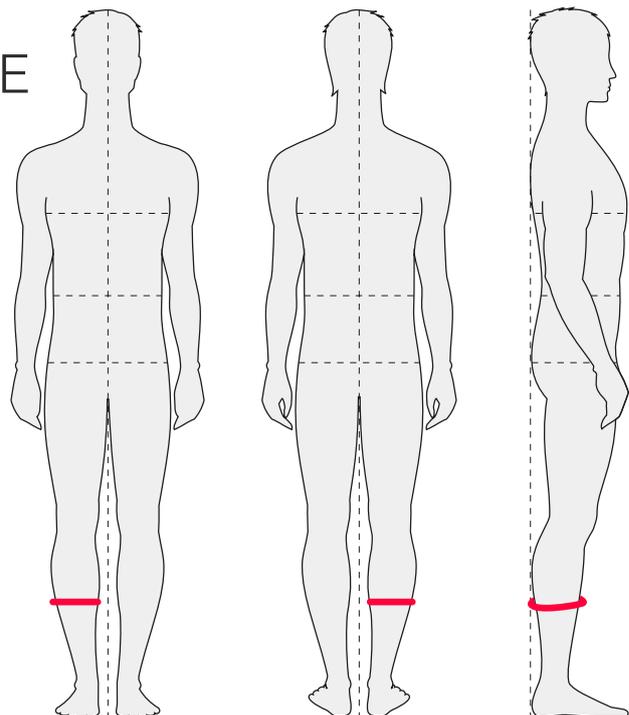

15 KNEE CIRCUMFERENCE

Measure, remaining in a standing position the circumference of the knee at the widest point.

16 CALF CIRCUMFERENCE

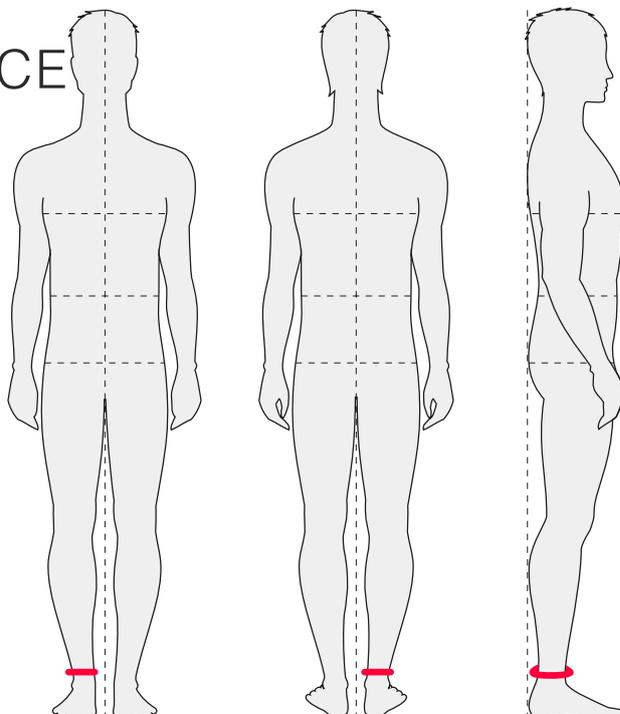

Measure the circumference of the calf at the widest point.

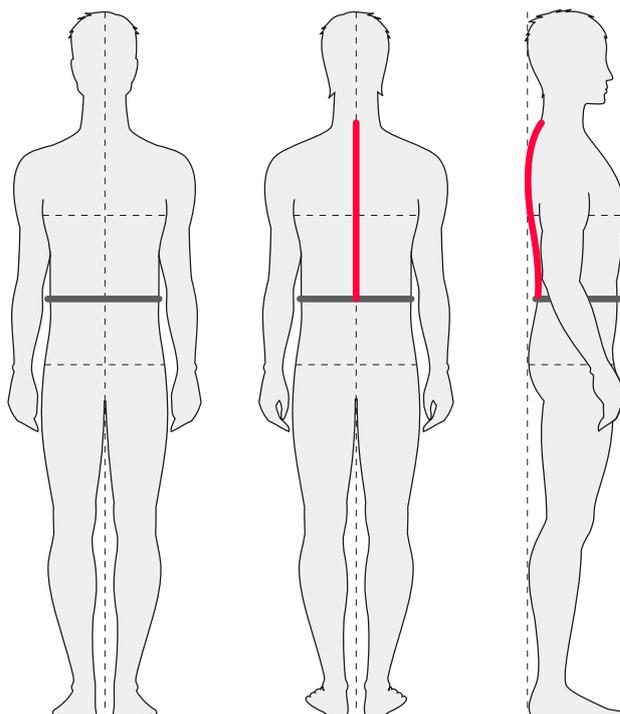

17 ANKLE CIRCUMFERENCE

Measure the circumference of the ankle just before the ankle bone.

18 SPINE LENGTH

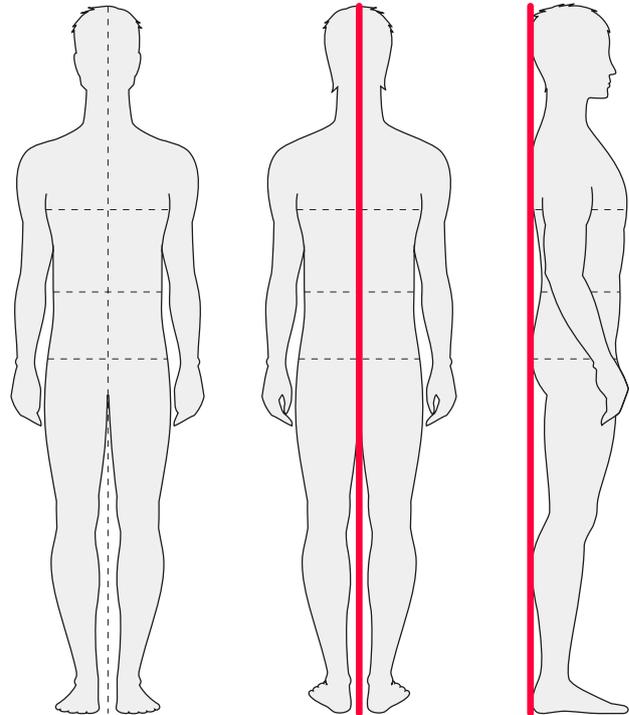

Measure from the base of the neck to the height of the waist line.
Help to identify the point of waist by tying a lace at the navel.

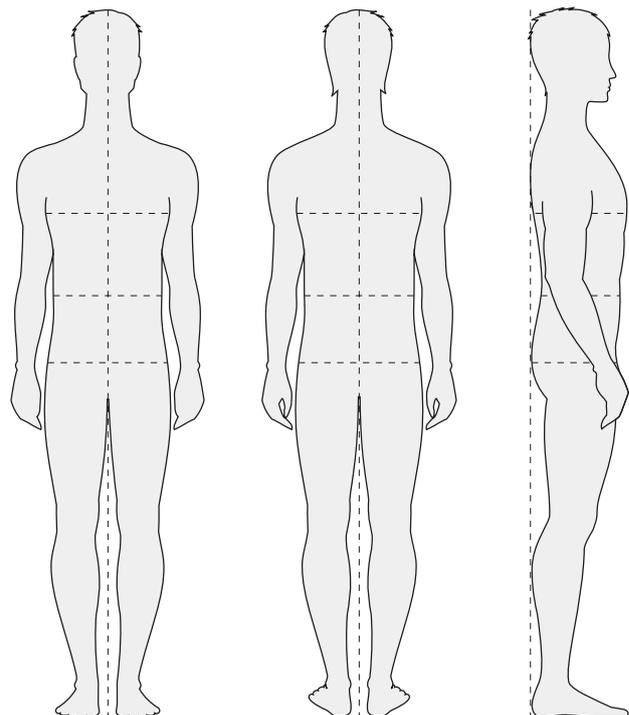

19 HEIGHT

Total height of the person.

20 WEIGHT

Weight of the person.

VIRCOS

21

22

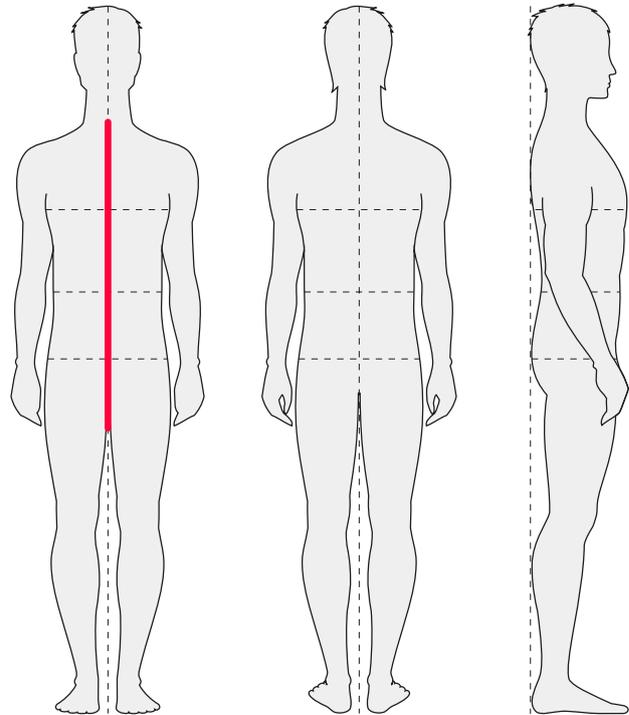

TOTAL SLEEVE
LENGTH

Sum of measure 9 + measure 10.

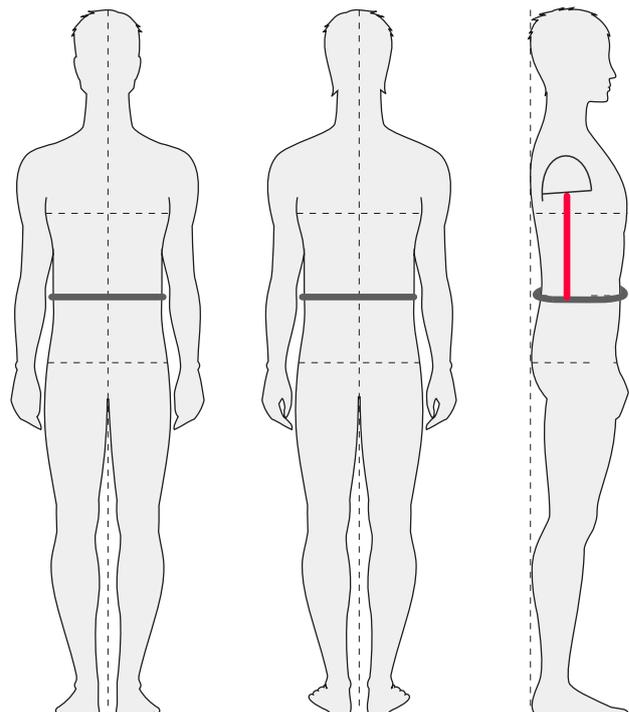

23 CENTER FRONT

Measure from base of the neck to the crotch.

24 SIDE LENGTH

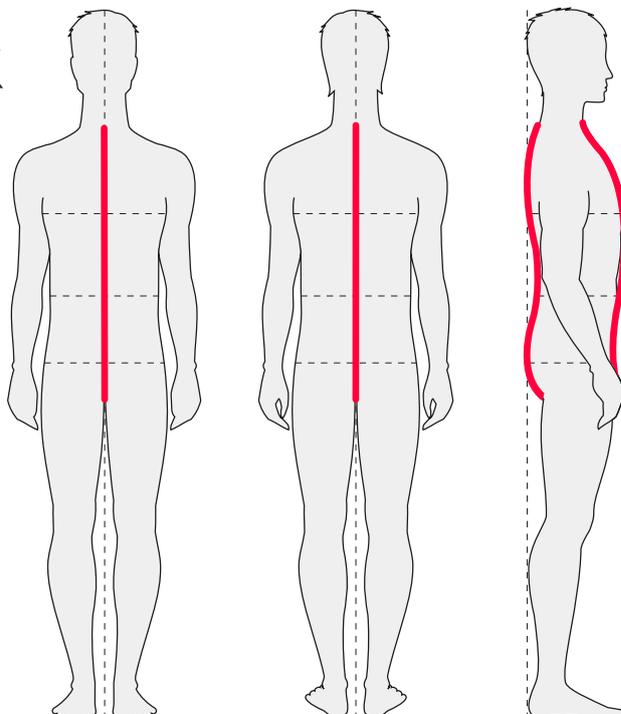

Measure the side of the upper body, from the base of the armpit to the waist line.

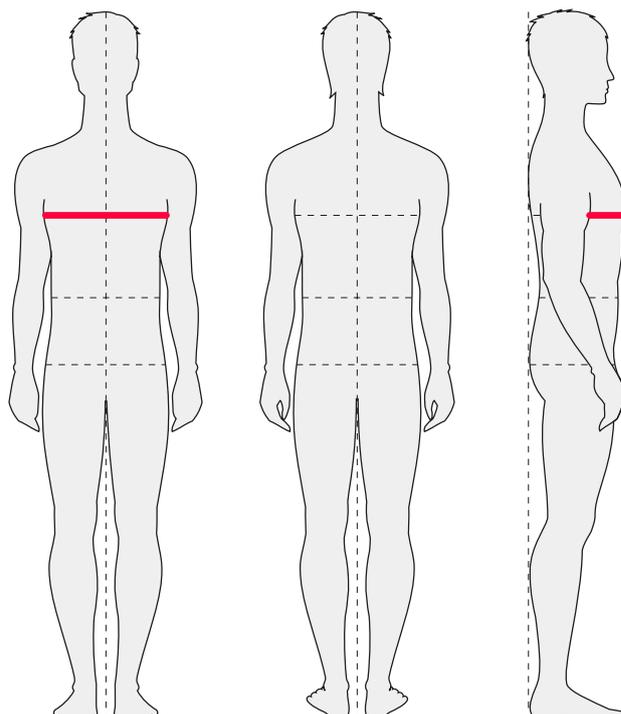

25 FRONT TO BACK NECK

Measure the distance between the base of the front neck to the base of the back neck through the crotch.

26 FRONT WIDTH

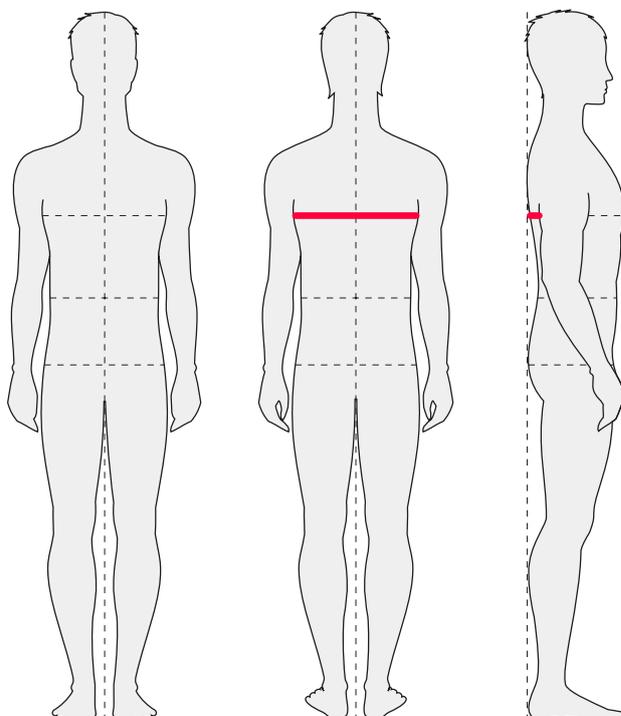

Measure distance between armpits across the front chest keeping arms along sides of the body.

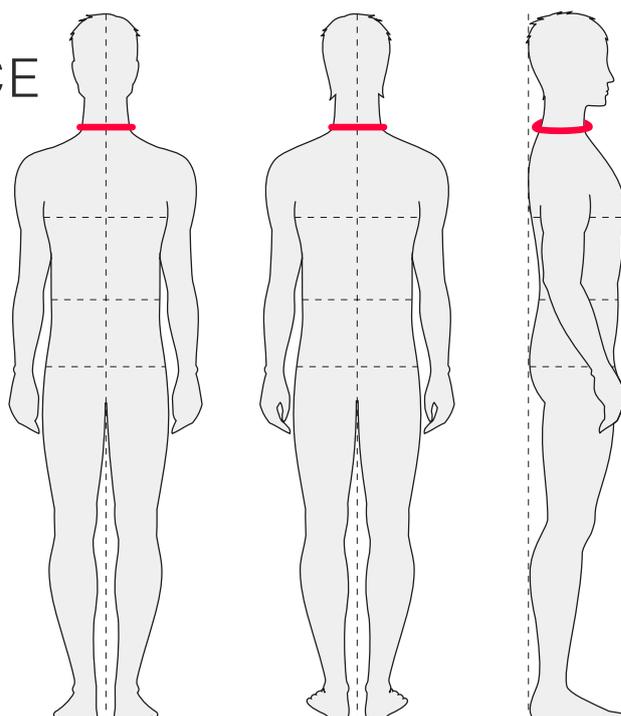

27 BACK WIDTH

Measure distance between armpits across the back chest keeping arms along sides of the body.

28 NECK CIRCUMFERENCE

Measure the neck circumference, at the base of the neck. Measure tape has to be not too tight to the neck or not too loose.

29 ELBOW CIRCUMFERENCE

Measure the elbow circumference
with arm straight
